

# WOMEN'S HEALTH IN DM/FSHD

Sexual and Menstrual Function in Women with Myotonic Dystrophy Type 1 (DM1), Type 2 (DM2), and Facioscapulohumeral Muscular Dystrophy (FSHD)

Who?

You can partake if you:

- Are age 18 or older
- Identify as female (female sex at birth)
- Have a diagnosis of DM1, DM2, or FSHD

What?

Complete a one-time survey asking about:

- Muscular dystrophy
- Menstrual history
- Sexual function
- Pelvic pain
- Bowels & urination
- Fertility & pregnancy

Why?

Your answers will help better understand symptoms related to sexual and menstrual health in people with DM1, DM2, and FSHD.
