Maryland

When a family or individual is faced with a progressive condition such as DM1 or DM2 they are often presented with additional financial expenses as well as loss of a steady income. This section attempts to gather financial resources that are available on a state level for persons living in the United States. By no means is this section complete; we invite you to share with us any resources you’ve identified.

This is an on-going project. We will add more resources as we gather them; please send us resources you know of that are not currently listed.

Please be advised that each organization has its own eligibility and application requirements. None of these organizations are affiliated with the Myotonic Dystrophy Foundation. We hope you will share your experiences with us – let us know if you are successful in finding a good resource to help your family.

Employment

EID Program: provides Medical Assistance (Medicaid) to working Marylanders with disabilities who meet a few conditions. Medical assistance includes covering most medical services for individuals who have no other health insurance, saving individuals with Medicare $1,000-$12,000 a year and supplementing private insurance by paying for some services that the other insurance does not cover.
